## Abstract

Game theory studies the strategic interactions between and among decision makers, players, through mathematical models called games. This paper presents an overview on the evolution of the application of game theory to fisheries economics. The first applications emerged in the late 1970s.

## How do I use the new advanced search?

Last updated on 24/07/2018 01:46 PM

[▶ Performing an advanced search tutorial](#)

The new advanced search form offers an open design which allows you to specify one or more pieces of information (e.g., keywords, authors, dates, etc.) to find related documents in ScienceDirect. You can easily build an explicit query using multiple Boolean operators and nested clauses in your search.

None of the available fields are mandatory to an advanced search query. You are simply required to complete at least one field with searchable information.

All of the fields are optional.

Find out [more](#) about the new advanced search.

# ScienceDirect Topics helps researchers uncover critical and contextual information within their workflow

- 用分类法整合图书和期刊内容，链接概念和关联
- 通过机器学习和自然语言处理来理解上下文、含义、相关性
- 在全文文献中进行模式匹配，确认内容类型和“使用案例”
- 创建全文“片段”的动态自由层，使文献更易被搜索引擎发现

\*When a short definition is not available, the longer definition can be found in Book excerpts

# ScienceDirect Topics

The screenshot shows the ScienceDirect Topics page for 'Pyramidal tracts'. The page layout includes a header with the ScienceDirect logo and navigation links for 'Journals' and 'Books'. Below the header, there is a breadcrumb trail 'Back to previous page > Pyramidal tracts'. The main content area is divided into two columns. The left column features the title 'Pyramidal tracts' with a circled '1' next to it, followed by a paragraph describing the tract and its path. Below this, there is a section titled 'Learn more about Pyramidal tracts' with a circled '3' next to it, which contains two sub-sections: 'Spinal Tracts – Descending/Motor Pathways' and 'Spinal Cord'. The right column features a section titled 'Related terms' with a circled '2' next to it, listing various terms related to the main topic. The page is designed to provide a comprehensive overview of the topic and guide the user to further resources.

ScienceDirect Journals Books

Back to previous page > Pyramidal tracts

## Pyramidal tracts 1

The pyramidal tract exits the cortex, and after passing the pyramids of the medulla , the majority of these fibers cross to the opposite side and descend in the corticospinal tract through the spinal cord ( Figure 3 ). Some of the fibers that do not cross over in the medulla travel ipsilaterally down the cord and cross to the opposite side in the neck or upper thoracic region.

From: [Reference Module in Biomedical Research](#), 2014

RTMS, Motor area, Motor cortex, Cervical spinal cord, Decussate, Motor neuron, Corticobulbar tract, Facial nucleus, Precentral gyrus, Anterior horn cells

### Learn more about Pyramidal tracts 3

#### Spinal Tracts – Descending/Motor Pathways

Paul Rea, in *Essential Clinical Anatomy of the Nervous System*, 2015.

#### Pyramidal tracts

The **pyramidal tracts** are comprised of the corticospinal and **corticobulbar** tracts. These are called as **pyramidal tracts** as they crossover at the level of the pyramids in the medulla. They are collections of upper **motor neuron** fibers which go to the **spinal cord** (corticospinal) or the brainstem (corticobulbar) and control the motor function of the body.

#### Spinal Cord

Gulgun Sengul, Charles Watson, in *The Human Nervous System (Third Edition)*, 2012.

#### Corticospinal Tract

The corticospinal tract, also called the pyramidal tract because its fibers form the **medullary pyramids**, is found in all mammals with considerable variation between species. The dorsal corticospinal tract is the major corticospinal bundle, found in the **dorsal column** in rodents. In primates, it is highly developed and the major bundle is in the **lateral column**.

The fibers that give rise to the corticospinal tract in adult mammals arise from the **neurons** of the **precentral gyrus** and the **pa-**
